Attendance is free for current paid members & \$80 for non-members. Engineers interested in attending must register online at <https://fs8.formsite.com/surveyschaorg/Eng11-20/index.html>.

Once you register, you will receive an email from Carmen Goulet with your log in information for both days, each day will be a different log in, please be sure to add that to your calendar.

CEU's

6 CEU's have been applied for thru ASHE. You will receive your certificate by email from Kim Wooten approximately one week after the webinar.

Ken Gregory Speaker Bio

Ken possesses over 29 combined years of healthcare and consulting experience in the areas of general maintenance/engineering, construction management, physical environment management,

and regulatory compliance, and is a Certified Healthcare Safety Professional (CHSP) and Certified Healthcare Operations Professional (CHOP). Ken serves as an instructor in numerous healthcare regulatory/accreditation physical environment subject matter. He has served as member of multiple NFPA technical committees including "The Technical Committee on Safety to Life in Healthcare Occupancies" for NFPA 101, and currently serves on the "Correlating Committee on Healthcare Facilities" for NFPA 99, and NFPA Hazardous Materials and Waste Committee. He also serves as an active member of the ASHE "Editorial Advisory Group". Ken previously served 14 years in management of all support services at multiple hospitals, before beginning his consulting career.

Summary & Objectives:

With the adoption of NFPA 99 & 101, 2012 editions by CMS, numerous code changes have taken place that organizations need to take heed to. Some changes are more stringent, some provide valuable advantages such as suite rule changes, locking doors in the means of egress criteria, etc. Please join us for two 3 hours sessions to review the basics in compliance with these two important code editions.

Learning Points:

- Basic NFPA 99 & 101-2012 information for applicability
- Review of LSC Chapters 18 & 19 (Healthcare Chapters)
- Information for Life Safety Drawings for ongoing use to indicate Life Safety Code Components
- Review of key components of NFPA 99-2012
